

# CKD Resources Available for Primary Care

## 1. Netcare eReferral to obtain Nephrology Advice

This can be used any time you have a non-urgent question regarding your patient with Chronic Kidney Disease (CKD).

[Click here](#) for FAQ and "How to Create a Request for Advice".

## 2. Diagnose and Manage CKD patients using [www.ckdpathway.ca](http://www.ckdpathway.ca)

The CKD clinical pathway will help you diagnose, medically manage and appropriately refer adults with CKD.

## 3. TELUS Health EMR new Outcomes Dashboard highlights CKD and CACP\* eligible patients

CKD patients can be identified via text/ICD-9 searches, visit/03.04J billing history, and abnormal labs. EMR Dashboards also offer ongoing monitoring and recall support.

## 4. TELUS Health EMR CACP\* templates are self-populating with clinical guidelines and resources for CKD patients

This point-of-care template integrates CKD-specific goals, medical management, referral criteria, and nutrition handouts.
